

The Original Flowrox Valves for Filters

Since 1977

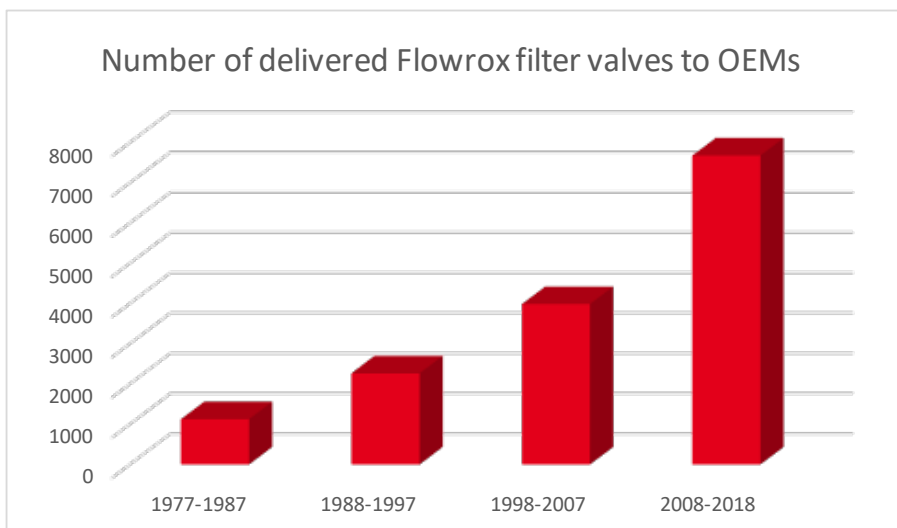

Flowrox is the first choice manufacturer for valves used in pressure filters. Based on years of experience we have engineered the most reliable solution including optimal elastomers, construction materials, actuators and operational performance.

- Leading filter manufacturers rely on Flowrox valves.
- More than 40 years of experience with over 150 000 deliveries in demanding industrial process applications.
- Over 15 000 valves delivered for filter duty

Flowrox service operates all around the globe. Dedicated and experienced Flowrox valve and filtration experts are available to support in six continents.

All leading filter manufactures rely on Flowrox filter valves.

Flowrox filter valve deliveries during the last four decades.

Proven Performance

Leading filter valve manufacturer

Heavy duty pinch valves with robust, reliable and safe construction

Special materials and coatings, tailored to customer's requirements

Vast experience in filtration services

Safety comes first!

Safety is extremely important to us. All Flowrox valves are designed with:

- Body against nominal pressure
- Sleeve leakage indicators available
- Safety covers available

Filter Valve Features

- Tailored structures based on customer demands:
Actuators, limits switches, removable lower pinch bar, adjustable time open/closed
- Guide bushings on both side of body: Well guided pinching
- Quick and reliable sleeve adjustment to gain the longest sleeve lifetime
- Large selection of elastomers for chemicals and abrasive mediums
- Fail-safe options (open, close, stay)
- Special materials and special coatings

Flowrox Digital Services

Flowrox Digital Services is a new way to combine your process and IIoT (Industrial Internet of Things). Through Flowrox Malibu™ online portal, Digital Services provide:

- Remote and real-time insight into the pinch valves' performance and sleeve lifetime
- Preventative maintenance

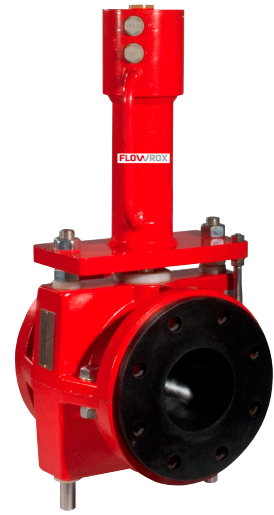

Valve operation cycles and their average values are shown in Flowrox Malibu™ online portal. No separate sensors are needed.

Any pressure filter can also be upgraded with Flowrox Smart Filtration. It enables remote, real-time insight into the filtration process. This helps to troubleshoot and optimize the process.

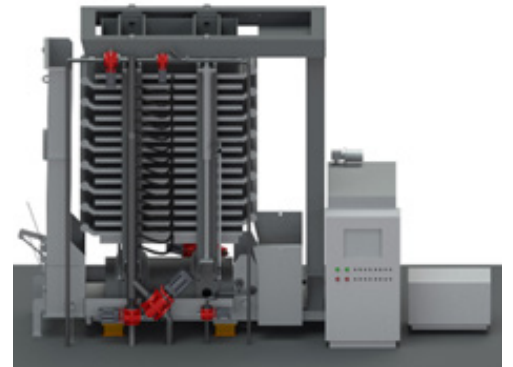

Global Presence, Local Service

Flowrox is a family-owned global company headquartered in Finland. It specializes in flow control, pumping, filtration solutions and environmental technologies. Flowrox products and services are enhanced with IIoT solutions and intelligent systems. Flowrox serves a number of process industry applications, especially in mining, minerals processing, chemical, energy and environmental industries with over 150 000 deliveries.

Flowrox has subsidiaries in the USA, Australia, Chile, Peru, South Africa, Russia, Sweden and China as well as more than 230 sales representatives in over 80 countries.

Flowrox filter valves can have hydraulic, pneumatic, electric or manual actuators.

Smart Filtration utilizes existing control system and sensors and connects the filters to the Flowrox Malibu™ online portal.
